dab Data Products

Unlock the Power of Financial Insights with Our Predefined Data Products for SAP Data

Tailored, fully automated, scalable

dab

dab Data Products offer a predefined SAP data basis tailored for advanced analytics

Automated Data Processing
dab Data Products are end-to-end workflows that extract raw data from your SAP systems, process it and generate output tables. The whole process is fully automated and can be scheduled for real-time insights.

Purpose-built for Users
dab Data Products are developed to provide insights for different departments. They are tailored to the needs of our customers, enable decision-making, improve reporting and form the basis for data analyses and AI efforts.
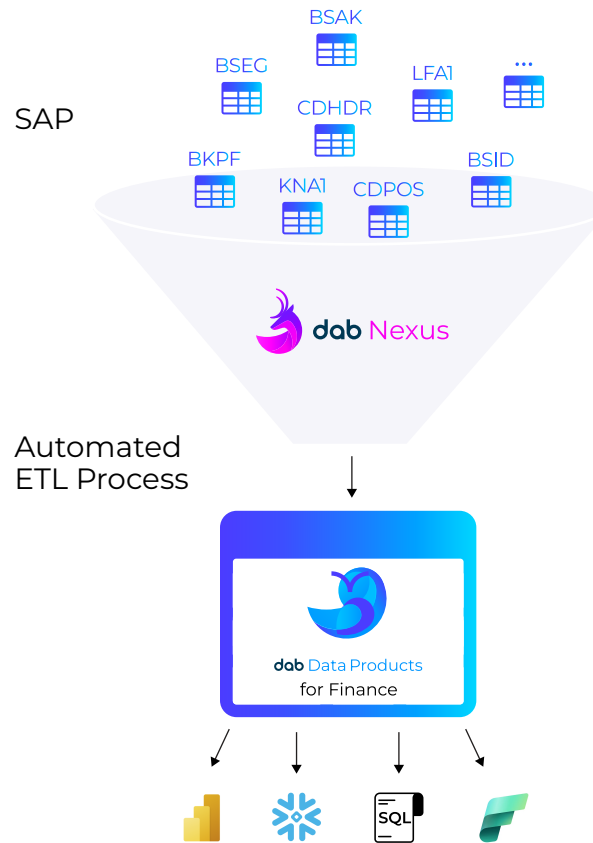

Self-Service
Users can interact with dab Data Products without requiring deep technical expertise. This includes things like customizable reports, dashboards, or data visualizations.

Scalability and Scope
dab Data Products are designed to handle large volumes of data and scale as the organization or database grows. They can deliver data to your data lake solutions for you and the whole organisation.

Automated ETL Process

dab Data Products for Finance

We offer dab Data Products for a variety of departments, including **Finance**:

Enhance your financial decision-making with our innovative Data Product, built specifically for finance professionals who want to maximize the value of their SAP data. Our solution seamlessly integrates data from the **General Ledger**, **Accounts Payable**, and **Accounts Receivable,** offering a comprehensive view of your financial landscape.

Use Cases for Finance

Improved Financial Reporting
By integrating real-time SAP data into their financial workflows, businesses can automate their report generation. Customizable dashboards provide detailed insights at a glance, enabling more informed decision-making and accurate financial forecasting. This results in fewer manual errors and faster, more reliable financial analysis, helping businesses remain agile and data-driven in their strategies.

Optimize Financial Processes for Maximum Efficiency
dab Data Products for Finance can help optimize key processes, such as Accounts Payable and Receivable. With real-time access to payment schedules, invoice tracking, and cash flow management, they significantly reduce processing times and minimize inefficiencies. AI-driven analytics help identify bottlenecks, allowing businesses to optimize workflows, improve supplier relationships, and maintain better control over their financial health, regardless of company size.

A Solid Basis for AI Use Cases
AI applications such as Microsoft's Copilot or Azure AI Studios need a solid data basis to work properly. dab Data Products offer you the possibility to make use of the AI capabilities from Microsoft and focus on developing the AI use cases instead of endlessly developing the right data basis.

Why choose dab Data Products for Finance?

Scalable Solution

Whether you're a small business or a large enterprise, our solution grows with your data needs.

Turn Financial Data into Strategic Assets

Our product helps you transform financial data into a strategic asset that drives innovation and growth. Don't just manage your financial data - unlock its full potential by optimizing operations, improving accuracy, and harnessing AI for insights that prepare you for the future.

Ready to Deploy

Designed with finance professionals in mind, our product meets the exact data needs of modern finance teams.

Discover how our Data Products for SAP data can optimize your financial operations and put your business on the path to success.
