dab Data Products

Optimize Your Procurement Performance with Our Predefined Data Products for SAP Data

Tailored, fully automated, scalable

dab

dab Data Products offer a predefined SAP data basis tailored for advanced analytics

Automated Data Processing
dab Data Products are end-to-end workflows that extract raw data from your SAP systems, process it and generate output tables. The whole process is fully automated and can be scheduled for real-time insights.

Purpose-built for Users
dab Data Products are developed to provide insights for different departments. They are tailored to the needs of our customers, enable decision-making, improve reporting and form the basis for data analyses and AI efforts.
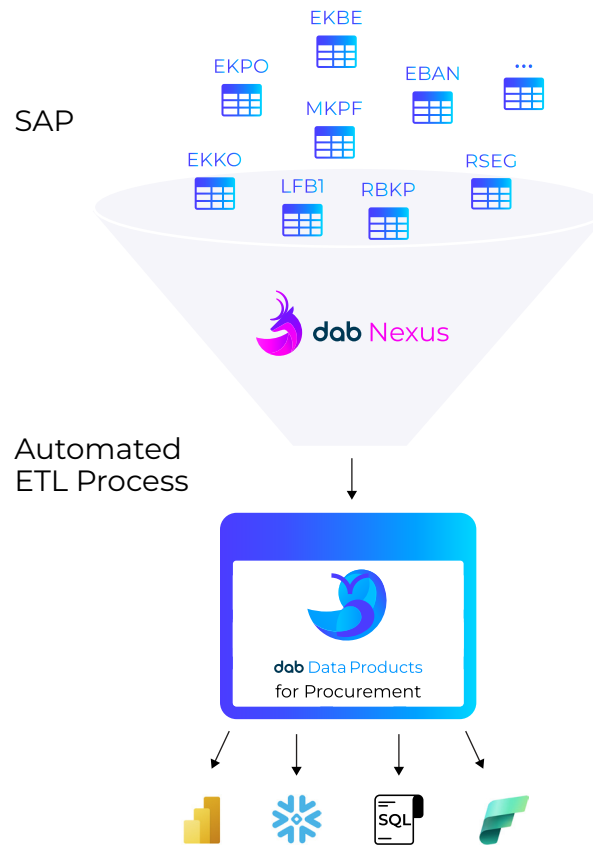

Self-Service
Users can interact with dab Data Products without requiring deep technical expertise. This includes things like customizable reports, dashboards, or data visualizations.

Scalability and Scope
dab Data Products are designed to handle large volumes of data and scale as the organization or database grows. They can deliver data to your data lake solutions for you and the whole organisation.

dab Data Products for Procurement

SQL

We offer dab Data Products for a variety of departments, including **Procurement**:

Unlock the full potential of your SAP data with our comprehensive solution, specially designed for purchasing departments. dab Data Products seamlessly integrate essential data from Purchasing Documents, Goods Receipts, and Vendor Invoices, providing a holistic view of your procurement operations within SAP.

Use Cases for Procurement

Automate Procurement Reporting and Insights
Streamline report generation with real-time SAP data and reduce manual effort. Customizable dashboards offer instant insights into key procurement metrics such as supplier performance, purchasing volumes, and cost-saving opportunities, empowering faster and more informed decision-making.

Optimize Procurement Processes with AI
Gain real-time visibility into purchase orders, goods receipts, and vendor invoices, allowing teams to streamline operations, improve supplier relationships, and enhance sourcing efficiency. Leverage AI-driven analytics using AI Tools like Microsoft's Copilot and Azure AI Studios to forecast procurement needs, prevent supply chain disruptions, and identify inefficiencies.

Scalable and Data-Driven Procurement Strategy
Ensure procurement operations are scalable, from small teams to global supply chains. The integration of SAP data enables AI-ready analytics for long-term planning, helping procurement teams anticipate stock requirements, optimize vendor management, and drive cost-saving strategies.

Why choose dab Data Products for Procurement?

Scalable Solution

Whether you're managing a small procurement team or a global supply chain, our solution scales to fit your business' unique needs.

Transform Purchasing Data into Actionable Insights

Don't just track your purchasing - transform your data into a powerful tool that drives operational efficiency and strategic sourcing. Our dab Data Products for SAP Data equips procurement teams with the insights they need to optimize supplier relationships, control costs, and anticipate future purchasing needs.

Quick ROI

Our predefined, out-of-the-box Data Products deliver actionable insights in days, not weeks. Additionally, our data products are customizable and adjustable to meet your specific requirements.

Discover how our Data Products for SAP data can revolutionize your procurement operations and give your business the strategic edge it needs to succeed.
