PROCESS MINING

Your ready-made Process Mining solution for SAP data

Process visualisations have become an important part of data analytics and support companies in various areas, such as process optimisation and control execution, refining workflows or ensuring regulatory compliance.

Regardless of your objectives in utilizing Process Mining, our software solution is designed to facilitate the achievement of your ambitious goals with minimal effort.

Harness the Power of your SAP Data

with dab's innovative solution

dab Nexus, dab AnalyticSuite, Microsoft Power Platform integration, and dab Link. Our suite is crafted for seamless SAP Data Analysis and Process Mining, embodying the essence of our motto: **Analytics simplified.**

dab Nexus - Simplified Data Extraction

Initiate Process Mining effortlessly with dab Nexus. Expertly designed for robust data extraction and secure storage of SAP data in a SQL database, it sets the stage for in-depth analysis.

dab AnalyticSuite - Event Log Creation

Unlock the power of dab AnalyticSuite with dab Nexus. Seamlessly transform your data into detailed event logs essential for targeted Process Mining. With over 300 predefined analytics integrated, ensure a tailored approach to your data analysis needs.

Microsoft Power Platform - Insightful Process Mining

Leverage the Microsoft Power Platform for advanced Process Mining visualisations, converting complex data into clear, actionable insights.

dab Link - Closing the Loop

Conclude your Process Mining with dab Link, which provides a direct link to your SAP system, enabling easy access to corresponding SAP transactions for efficient process follow-ups and document management, all within a single click.

Key Features

For Seamless Integration with Microsoft Power Platform

From data extraction to process insights - **fully integrated into the Microsoft stack**. The integration gets you all of the advantages of Microsoft's Power Platform.

Time and Cost Efficient

Ready-made event logs are saving time and money and ensure high quality results due to market knowledge and best practices.

Short Implementation Time

Typically, the implementation of Process Mining with dab and Microsoft is completed in less than a working day. Quick ROI is ensured.

Efficient Extraction

dab Nexus ensures efficient and reliable data extraction with innovative logic, eliminating time-outs and maximizing performance.

Practical Insights

Direct linkage from analysis to SAP transactions with dab Link.

Scalable

Suitable for all company sizes using SAP.

Synergy of Process Mining and Data Analytics

Enhance your Process Mining with our library of over 300 ready-to-use analytics, combining Process Mining and Data Analytics for powerful insights and prevention of non-compliant actors.

Opt for dab's solution for a streamlined, effective SAP Data Analysis and Process Mining experience, where analytics are made simple, and insights drive success.
